SONDOS MOHAMED GALAL

Machine Learning & Data Analysis Portfolio

Shorouk City, Cairo, Egypt • B.Sc. Computers & Artificial Intelligence • Expected Graduation: June 2027

Python • Pandas • NumPy • Machine Learning • Data Analysis • Streamlit • SQL

Professional Profile

Computer Science & Artificial Intelligence undergraduate with a strong interest in Machine Learning and practical data analysis. I build data-driven solutions using Python, preprocessing, exploratory analysis, visualization, and machine learning techniques, with a focus on turning raw datasets into clear, useful results.

Core Skills

Programming	Python, C++
Data Analysis	Pandas, NumPy, data cleaning, preprocessing, EDA
Visualization	Matplotlib, Seaborn, interactive dashboards with Streamlit
Machine Learning	Supervised learning, classification, regression, model evaluation
AI / Computer Vision	Neural Networks, Deep Learning, OpenCV, Image Processing
Databases & Tools	SQL, Git, GitHub, VS Code, Jupyter Notebook

Selected Projects

01 Sales Performance Dashboard

Data Analysis & Business Intelligence • Personal Portfolio Project

Built an end-to-end sales analytics solution that transforms transactional data into business KPIs and interactive visualizations.

- Cleaned and validated transactional data, handled duplicates and missing values, and engineered date and profitability features.
- Performed exploratory analysis to understand sales, profit, regional performance, product categories, and discount impact.
- Built KPI summaries and visual reports for revenue, profit, orders, and profit margin.
- Developed an interactive Streamlit dashboard with filters for year, region, and category.
- Tools: Python, Pandas, NumPy, Matplotlib, Streamlit.

02 Bank Term Deposit Prediction

Data Analysis & Machine Learning • Academic Project

Analyzed a Portuguese banking dataset to prepare a classification solution for predicting whether a client would subscribe to a term deposit.

- Performed data preprocessing and exploratory data analysis.
- Investigated feature distributions and relationships within the customer dataset.
- Prepared the dataset for machine learning and evaluated the data from a predictive modeling perspective.
- Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning.

03 Car Insurance Prediction

Data Analysis & Machine Learning • Academic Project

Developed a data analysis and machine learning workflow to predict whether a customer would purchase car insurance.

- Cleaned and preprocessed the insurance dataset using Python and Pandas.
- Performed exploratory data analysis and visualization to identify patterns in customer behavior.
- Prepared features and target data for machine learning.
- Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning.

04 Mobile-Controlled Car

Hardware / Embedded Systems • Academic Project

Developed a mobile-controlled car project combining software control with embedded hardware implementation.

- Implemented control logic for remote movement.
- Integrated software and hardware components into a working prototype.

Additional Academic Projects

E-Commerce Platform — Software Development • 2025

Course Platform Database — Database / Software Development • 2025

Maze / Problem Solving — Programming & Problem Solving • 2024

Counter — Hardware • 2024

Education & Training

B.Sc. Computers & Artificial Intelligence — Beni-Suef University
GPA: 3.12 / 4.0 • Expected Graduation: June 2027

Digital Egypt Pioneers Initiative (DEPI) — Machine Learning Engineer Track
July–December 2026 • Partnership with Microsoft

Leadership & Activities

IEEE AI Committee — Recognized as Best Member for March/April 2026.

Freelance Services

- Data Cleaning & Preprocessing — preparing raw datasets for analysis or machine learning.
- Exploratory Data Analysis — discovering patterns, trends, relationships, and data-quality issues.
- Machine Learning — building and evaluating predictive classification/regression workflows.
- Data Visualization & Dashboards — turning analysis into clear reports and interactive Streamlit dashboards.

Portfolio Project Note

The Sales Performance Dashboard is a personal portfolio project created to demonstrate an end-to-end data analysis and dashboard workflow. It is not presented as client work or professional employment.
