SONDOS MOHAMED GALAL

DATA ANALYSIS · VISUALIZATION · AI

I’m a Computer Science and Artificial Intelligence student interested in data analysis, visualization, dashboards, and machine learning. I enjoy organizing complex information into clear, useful outputs.

GitHub ■ · LinkedIn ■

ABOUT ME

I am an undergraduate student in Computer Science and Artificial Intelligence at Beni-Suef University, expected to graduate in 2027. I am developing practical skills through academic projects and training, with a focus on Python, data analysis, and AI techniques.

SELECTED PROJECTS

DATA ANALYSIS

Data Analysis — Phase 2

Notebook-based data analysis project presented without a dashboard. The project explores data and documents the analysis workflow and visual findings.

View project / repository ■

TEAM PROJECT

Ford GoBike Data Analysis

Collaborative team project analyzing the February 2019 Ford GoBike dataset. Repository details include data preprocessing, exploratory analysis, PostgreSQL, star-schema design, and analytical SQL queries. Add your exact individual contribution before publishing.

View project / repository ■

TEAM PROJECT

Hospital Management System

Collaborative software project hosted under the team leader’s GitHub account. Add the modules or tasks you personally completed before publishing.

View project / repository ■

MACHINE LEARNING

Bank Term Deposit Prediction

Academic data analysis and machine-learning project using a Portuguese banking dataset, including preprocessing, exploratory analysis, visualization, and preparation for predicting term-deposit subscription.

MACHINE LEARNING

Car Insurance Prediction

Academic project involving data cleaning, preprocessing, exploratory analysis, visualization, and a model to predict insurance purchase.

SOFTWARE DEVELOPMENT

Coursework & Software Projects

Additional university projects include a mobile-controlled car, an e-commerce platform, a course-platform database, and algorithmic problem-solving work.

TECHNICAL SKILLS

Python	**Pandas**	**NumPy**	**Matplotlib**
Seaborn	**SQL**	**Machine Learning**	**Deep Learning**
Neural Networks	**OpenCV**	**Image Processing**	**Git & GitHub**
Jupyter Notebook			

SERVICES

Data Analysis

Data cleaning, exploratory analysis, visualization, and insight summaries using Python.

Dashboard & Reporting

Presenting key metrics and findings in clear dashboard-style reports.

CV & Portfolio Formatting

Organizing real skills, education, and projects into a professional format.

Project descriptions should reflect verified deliverables and your exact contribution to team projects.
